DIRECTORATE GENERAL OF CIVIL AVIATION: AN OVERVIEW

Directorate General of Civil Aviation is the regulatory body governing the safety aspects of civil aviation in India. It is responsible for regulation of air transport services to/from/within India and for enforcement of civil air regulations, air safety and airworthiness standards. It also interfaces with all the regulatory functions of International Civil Aviation Organization.

DGCA's Vision Statement:

“Endeavour to promote safe and efficient Air Transportation through regulation and proactive safety oversight system.”

HIGHLIGHTS OF FINANICAL YEAR 2024-25

1. PASSENGER TRAFFIC STATISTICS

Air Passenger Traffic in India, both domestic and international witnessed a positive growth in the year 2024-25 compared to the previous year.

Table 1: Passenger traffic at a glance

S. No. (1)	TRAFFIC (2)	UNIT (3)	2023-24 (5)	2024-25 (P) (4)
1.	Domestic Passengers	Departing Passengers	153.7 million (13.0%)	165.5 million (7.7%)
2.	Domestic Airline Utilization	Revenue Passenger Kilometers (RPK)	148.2 billion (12.2%)	160.5 billion (8.3%)
3.	Domestic Airline Capacity	Available Seat Kilometers (ASK)	169.2 billion (6.9%)	185.8 billion (9.8%)
4.	International Passengers	Departing and Arriving Passengers	66.8 million (22.2%)	73.9 million (10.6%)
Total Passengers (Domestic & International)			220.5 million (15.6%)	239.4 million (8.6%)

Note: 1. Figures in parenthesis refer to percentage change over previous year.

Chart 1: Passenger traffic carried by scheduled carriers over last ten years

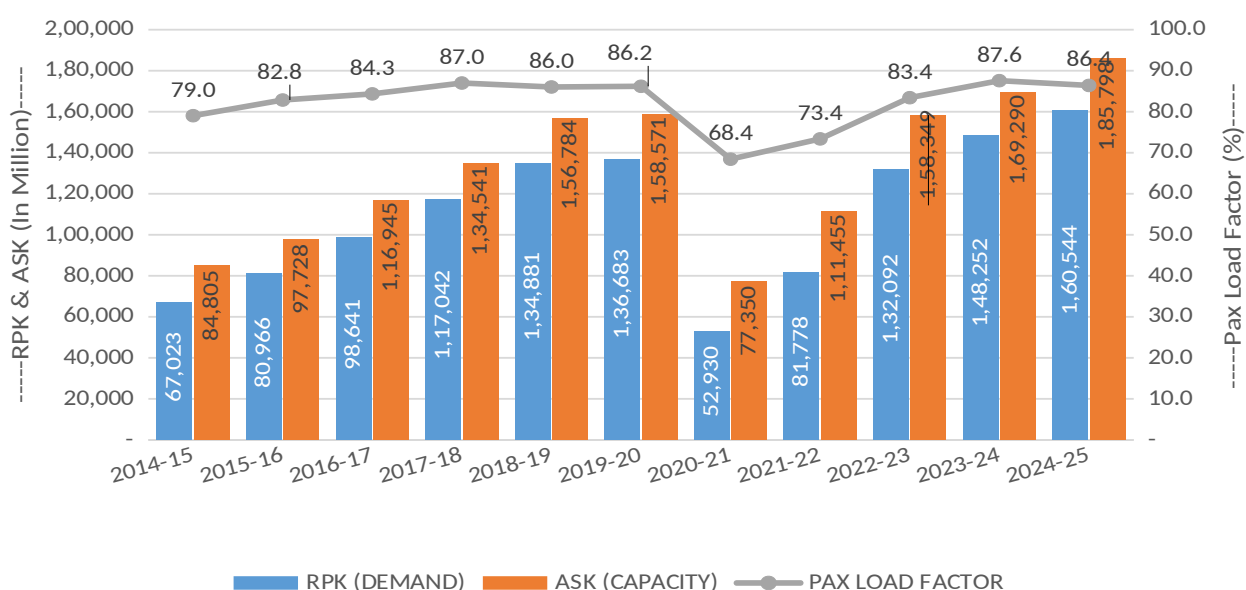

The domestic passenger traffic registered a compound annual growth rate (CAGR) of 9.0% during the period 2014-15 to 2024-25 while the international passenger traffic grew at 4.8 % (CAGR) during the same period.

Table 2: Year-on-year comparison of number of scheduled domestic passenger carried & PLF

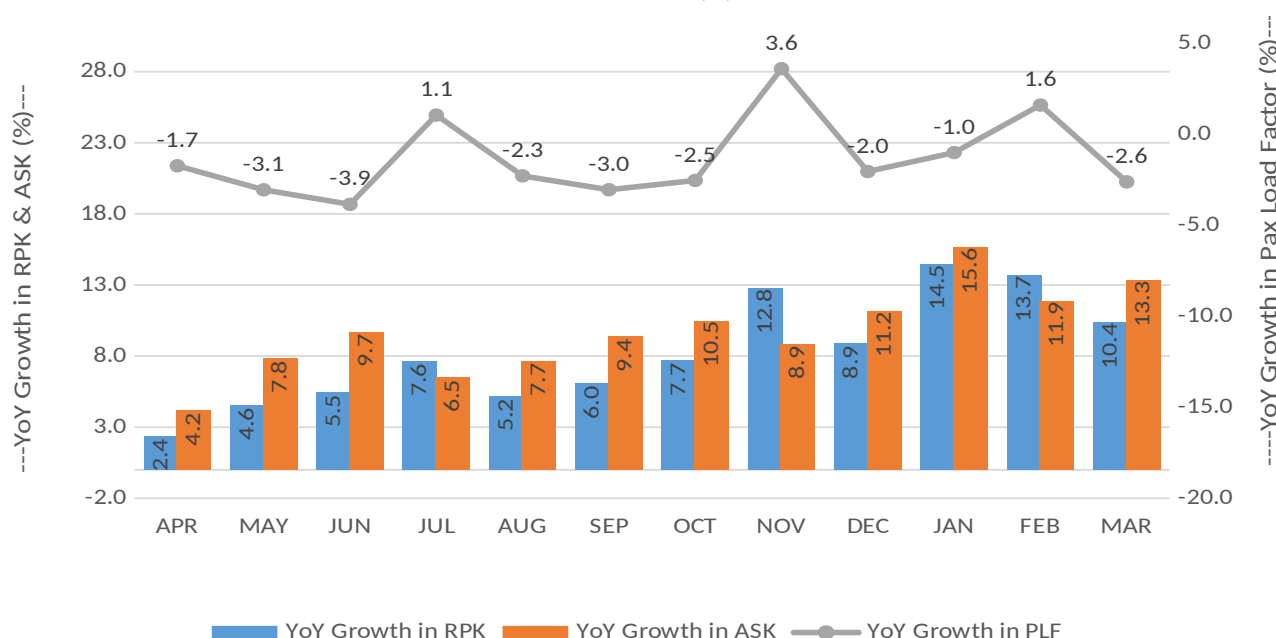

Sl. No.	Name of the Airline	Passenger carried (In Number)			PLF (%)		
		2023-24	2024-25 (P)	YoY Growth (%)	2023-24	2024-25 (P)	YoY Growth in PLF (%)
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)
1.	AIX CONNECT	1,04,82,064	37,60,720	-64.1	86.6	85.6	-1.2
2.	AIR INDIA	1,49,82,654	2,24,95,187	50.1	86.8	83.8	-3.4
3.	AIR INDIA EXPRESS	13,64,335	1,04,92,062	669.0	81.4	83.8	3.0
4.	AKASA AIR	68,45,064	76,83,824	12.3	89.4	90.1	0.7
5.	ALLIANCE AIR	16,24,872	12,84,387	-21.0	74.1	76.8	3.7
6.	FLY91	1,351	1,70,523	12522.0	49.7	69.0	38.9
7.	FLYBIG	1,55,542	16,992	-89.1	61.1	30.5	-50.1
8.	GO AIR	8,77,076		-100.0	91.2	0.0	-100.0
9.	INDIA ONE AIR	22,440	28,615	27.5	83.5	79.9	-4.3
10.	INDIGO	9,46,27,784	10,42,47,077	10.2	86.8	86.8	-0.1
11.	SPICEJET	78,92,153	53,05,995	-32.8	92.3	88.0	-4.7
12.	STAR AIR	4,17,839	6,77,627	62.2	75.3	74.1	-1.6
13.	VISTARA	1,43,81,508	93,78,683	-34.8	91.8	90.0	-2.0

Chart 2: Capacity v/s demand in domestic market over the last ten years.

In the year 2024-25, ASK and RPK in the domestic market registered a positive growth compared to the previous year. During the year from 2014-15 to 2024-25, the capacity (ASK) in the domestic market grew at a rate of 9.1 % (CAGR) while the demand (RPK) grew at 8.2% (CAGR) during the same period.

Chart 3: Month-wise year-on-year growth in capacity v/s utilization in domestic market, 2024-25 (P)

In the FY 2024-25, domestic market experienced rise in capacity as well as utilization, which is evident from the Chart 3 as both RPK & ASK witnessed positive growth as compared to the corresponding months in the previous year i.e. 2023-24.

Chart 4: Market share (%) in terms of domestic market RPK-2024-25 (P)

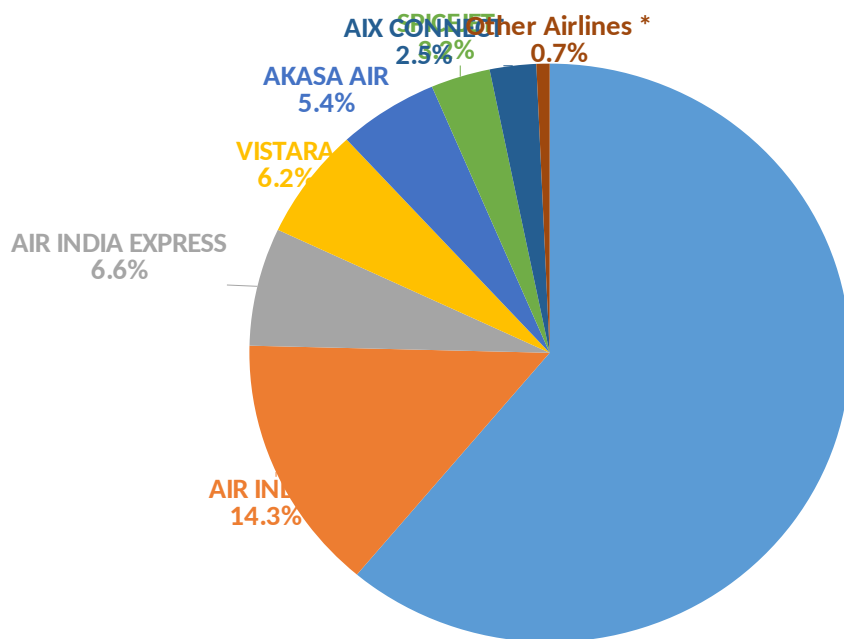

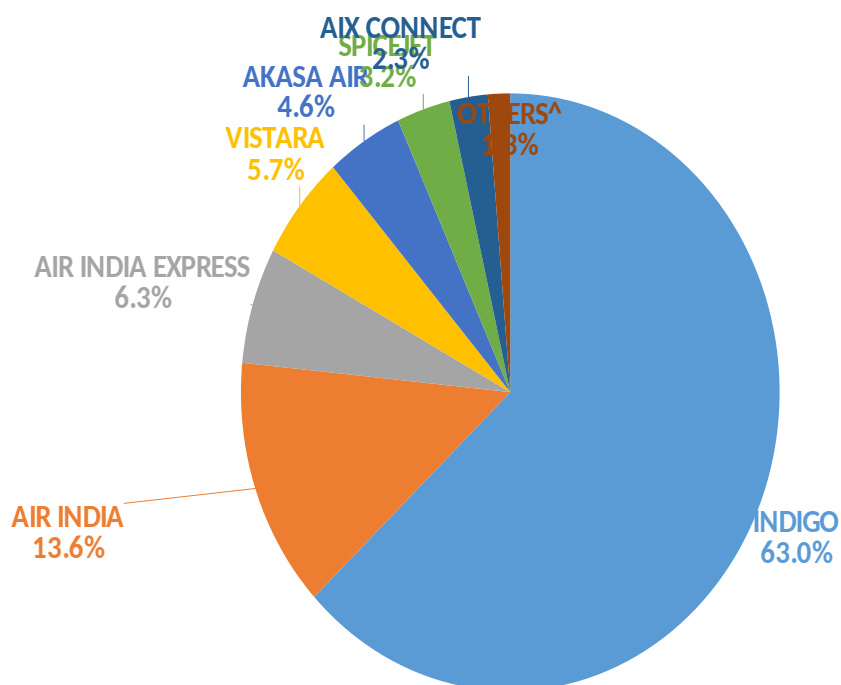

Chart 5: Domestic market share (%) in terms of passengers carried, 2024-25

In the year 2024-25 in terms of RPK Indigo had the maximum market share of 61.1 % followed by Air India (14.3%) and Air India Express (6.3%) and in terms of passengers carried Indigo had the maximum market share of 63.0% followed by Air India (13.6%) and Air India Express (6.3%).

Chart 6 (a): Passenger load factor (PLF) of Scheduled Indian carriers for Scheduled Domestic operations of 2024-25 (P)

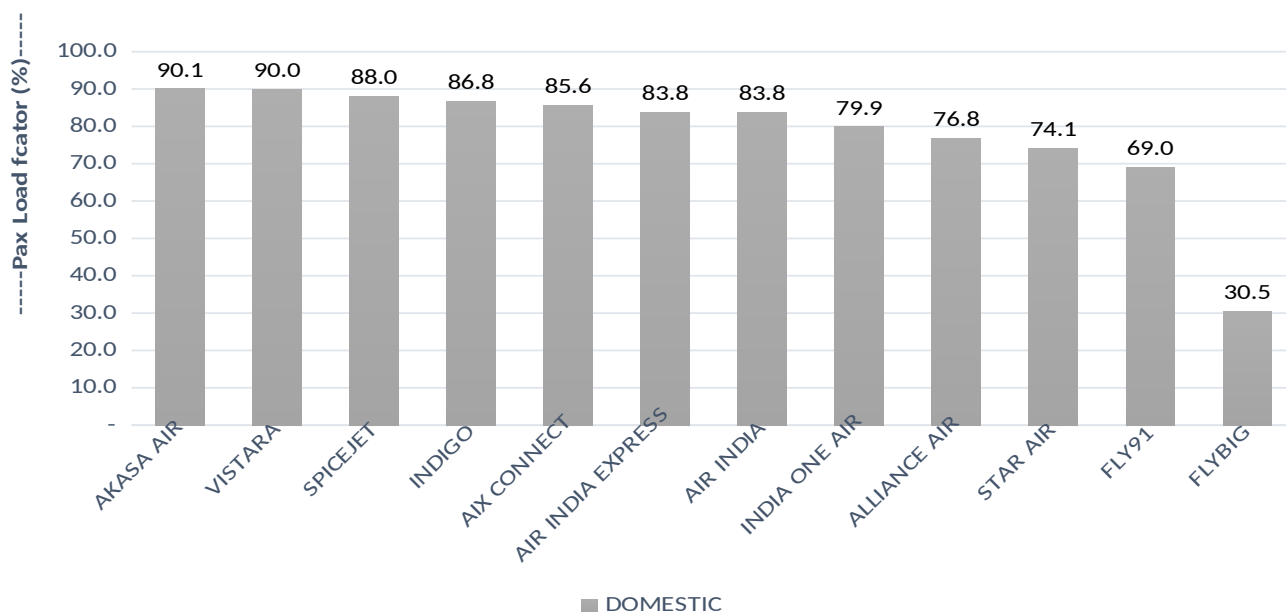

Chart 6 (b): Passenger load factor (PLF) of scheduled Indian carriers for Scheduled International operations 2024-25

In terms of Passenger Load Factor (PLF), a measure of capacity utilisation of airlines, for scheduled domestic operations, Akasa Air registered the highest PLF of 90.1% followed by Vistara (90.0%). Air India topped the position in terms of international operations with a PLF of (85.5%) followed by Indigo (84.0%).

Table 3: Market share (%) of scheduled Indian carriers and foreign carriers in terms of international passengers carried

S. No.	YEAR	FOREIGN CARRIERS	INDIAN CARRIERS
(1)	(2)	(3)	(4)
1.	2015-16	62.9	37.1
2.	2016-17	62.1	37.9
3.	2017-18	60.9	39.1
4.	2018-19	59.6	40.3
5.	2019-20	62.6	37.4
6.	2020-21	38.2	61.8
7.	2021-22	51.8	48.2
8.	2022-23	56.3	43.7
9.	2023-24	55.7	44.3
10.	2024-25	54.2	45.8

It is evident from the above table that share of Indian carriers is recovering after COVID period. In the FY 2024-25 Indian carriers share in international operations was 45.8 while the foreign carriers had the share of 54.2%.

Table 4: Market share (%) of top 15 scheduled operators – International operations, 2024-25

S. No.	Name of the Airline	Share (in%)
(1)	(2)	(3)
1.	INDIGO	19.3%
2.	AIR INDIA	13.4%
3.	AIR INDIA EXPRESS	8.3%
4.	EMIRATES AIRLINE	7.5%
5.	ETIHAD AIRLINES	3.8%
6.	SINGAPORE AIRLINES	3.2%
7.	QATAR AIRWAYS	3.0%
8.	AIR ARABIA	2.5%
9.	VISTARA AIRLINES	2.3%
10.	SPICEJET	2.0%
11.	THAI AIRWAYS	2.0%
12.	SAUDIA	1.9%
13.	LUFTHANSA	1.8%
14.	MALAYSIA AIRLINES	1.8%
15.	OMAN AIR	1.7%

Out of a total 85 scheduled international operators (Indian + Foreign), top 10 operators accounted for nearly 65.4% of total international Passenger traffic and top 15 operators accounted for 74.5% of the total international Passenger traffic in the year 2024-25. Indigo had the maximum market share (19.3%) followed by Air India (13.4%).

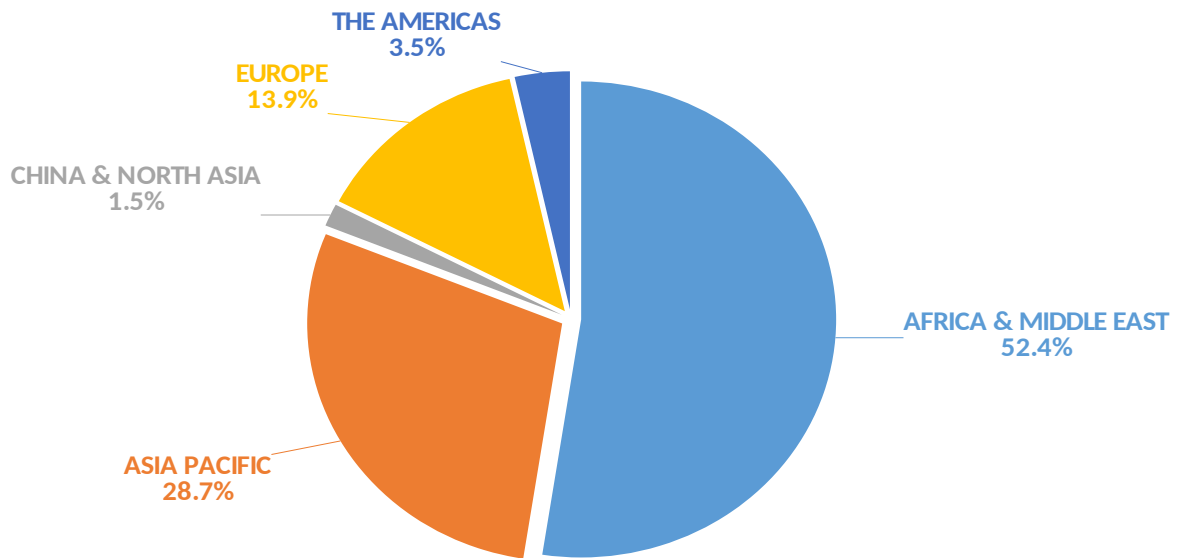

Chart 7: Distribution of India's inbound international passenger traffic, 2024-25

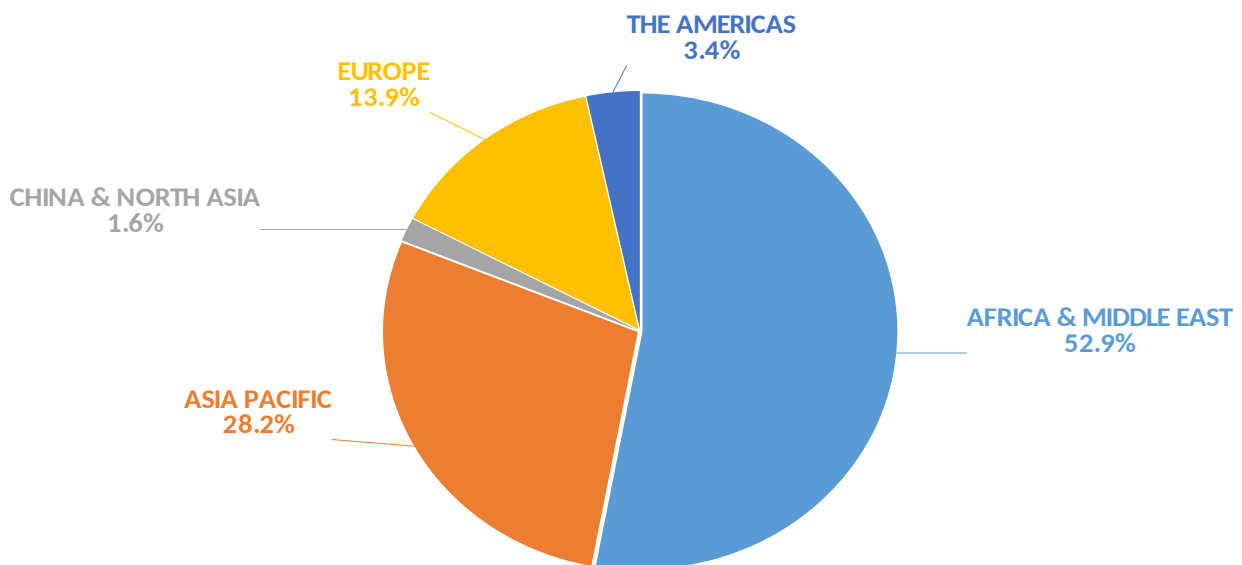

Chart 8: Distribution of India's outbound international passenger traffic, 2024-25

As per chart 7 & chart 8, more than half of the passenger traffic to and from India is accounted for the countries in the Africa & Middle East.

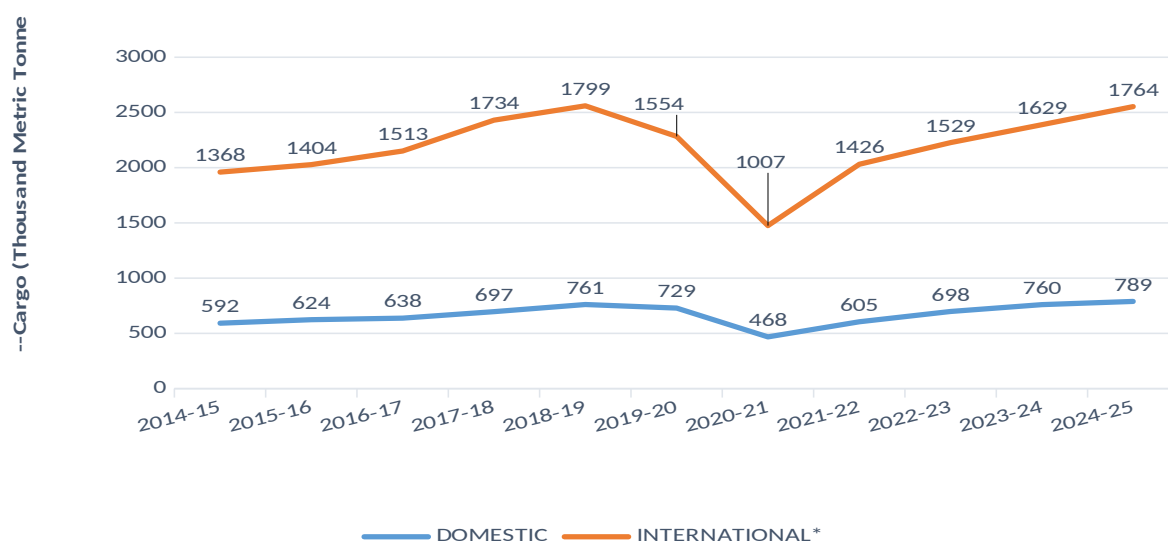

2. CARGO TRAFFIC STATISTICS

Air cargo carried by scheduled airline operators, both domestic and international witnessed a positive growth in 2024-25.

Table 5: Cargo traffic at a glance

S. No.	Cargo Traffic	2023-24	2024-25(P)
(1)	(2)	(3)	(4)
1.	DOMESTIC	7.60 lakh MT	7.89 lakh MT
		(8.9%)	(3.7%)
2.	INTERNATIONAL*	16.29 lakh MT	17.64 lakh MT
		(6.5%)	(8.3%)
Note: Figures in parenthesis refer to percentage change over previous year; MT: Metric Tonne. * International Cargo figures include Freight only.			

Chart 9: Cargo traffic carried by scheduled carriers over the last ten years

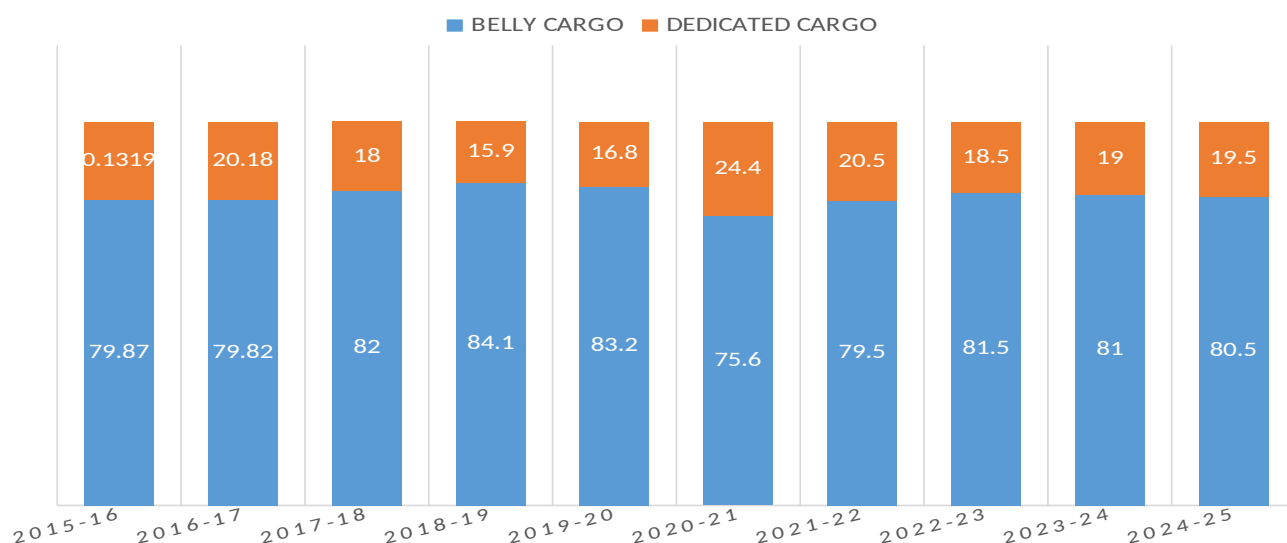

**International Cargo figures include Freight only.*

The domestic cargo traffic registered a growth of 2.9 % (CAGR) over the period from 2014-15 to 2024-25 while International cargo traffic grew at 2.6 % (CAGR) during the same period.

Chart 10: Proportion of domestic cargo carried as belly cargo and in dedicated freighters

Note: Dedicated cargo refers to the cargo carried by aircrafts solely meant for freight carriage.

The proportion of total domestic cargo carried by dedicated cargo carriers increased by 0.5 percentage points in the FY 2024-25 comparing to previous year. In financial year 2024-25 the dedicated cargo carrier was Blue Dart and Quikjet Cargo only.

Table 6: Proportion of international cargo* carried by Indian and Foreign carriers

S. No.	Year	Indian Carriers (%)	Foreign Carriers (%)
(1)	(2)	(3)	(4)
1.	2015-16	17.5	82.5
2.	2016-17	19.1	80.9
3.	2017-18	20.9	79.1
4.	2018-19	20.9	79.1
5.	2019-20	13.9	86.1
6.	2020-21	12.0	88.0
7.	2021-22	15.5	84.5
8.	2022-23	12.7	87.3
9.	2023-24	14.0	86.0
10.	2024-25(P)	16.7	83.3

**International Cargo figures include Freight only.*

Chart 11: Distribution of India's inbound international freight traffic, 2024-25(P)

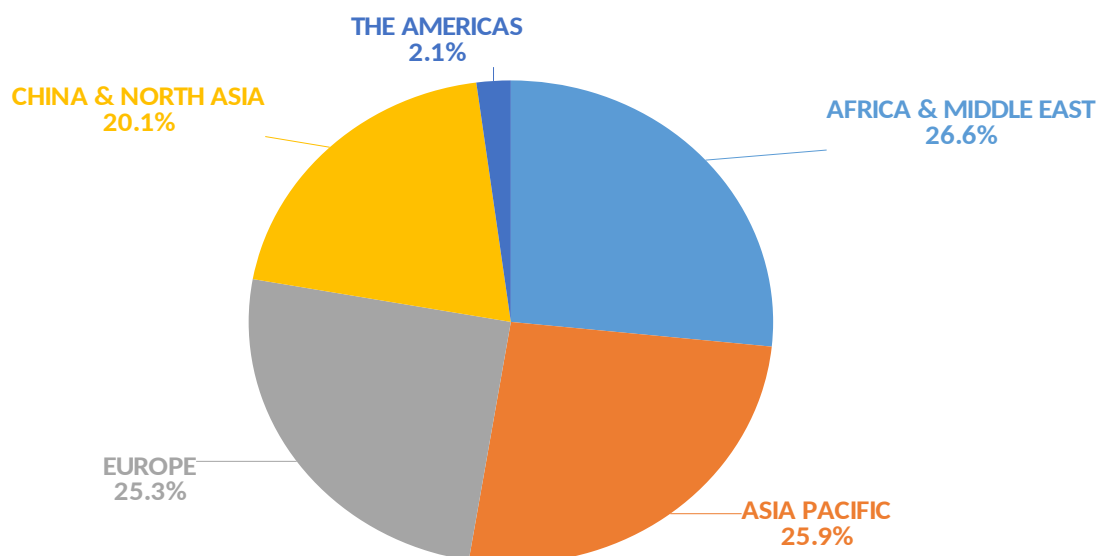

Chart 12: Distribution of India's outbound international freight traffic, 2024-25(P)

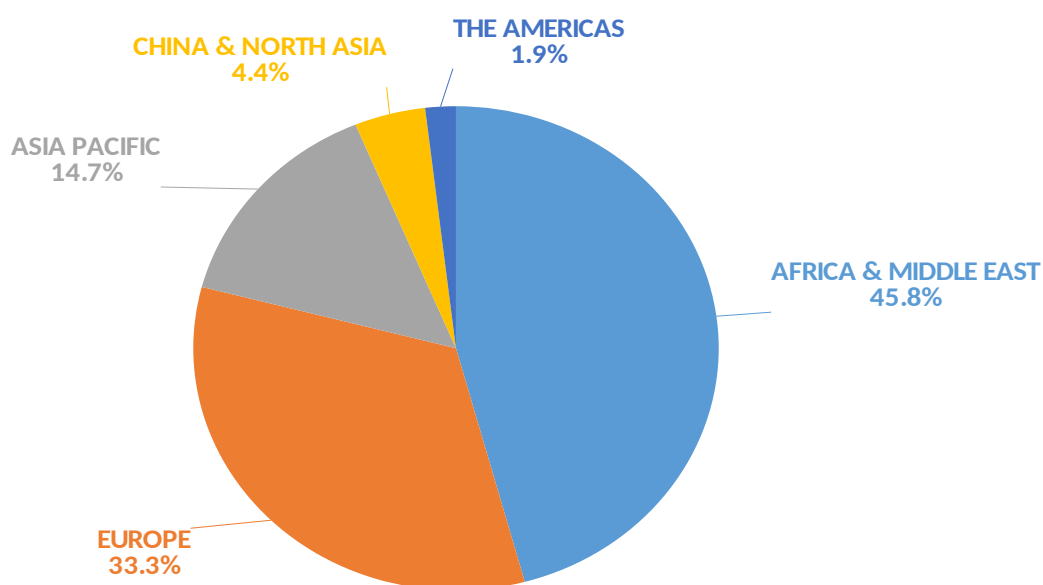

Chart 11 shows that as far as India's inbound freight traffic is concerned, Africa and Middle East tops the position with a share of 26.6% followed by Asia Pacific (25.9 %) and Europe (25.3 %) while Chart 12 shows that outbound freight in case of India's almost 46% of the freight traffic is carried to the countries in the Africa & Middle East followed by Europe (33.3 %) and Asia pacific (14.7 %).

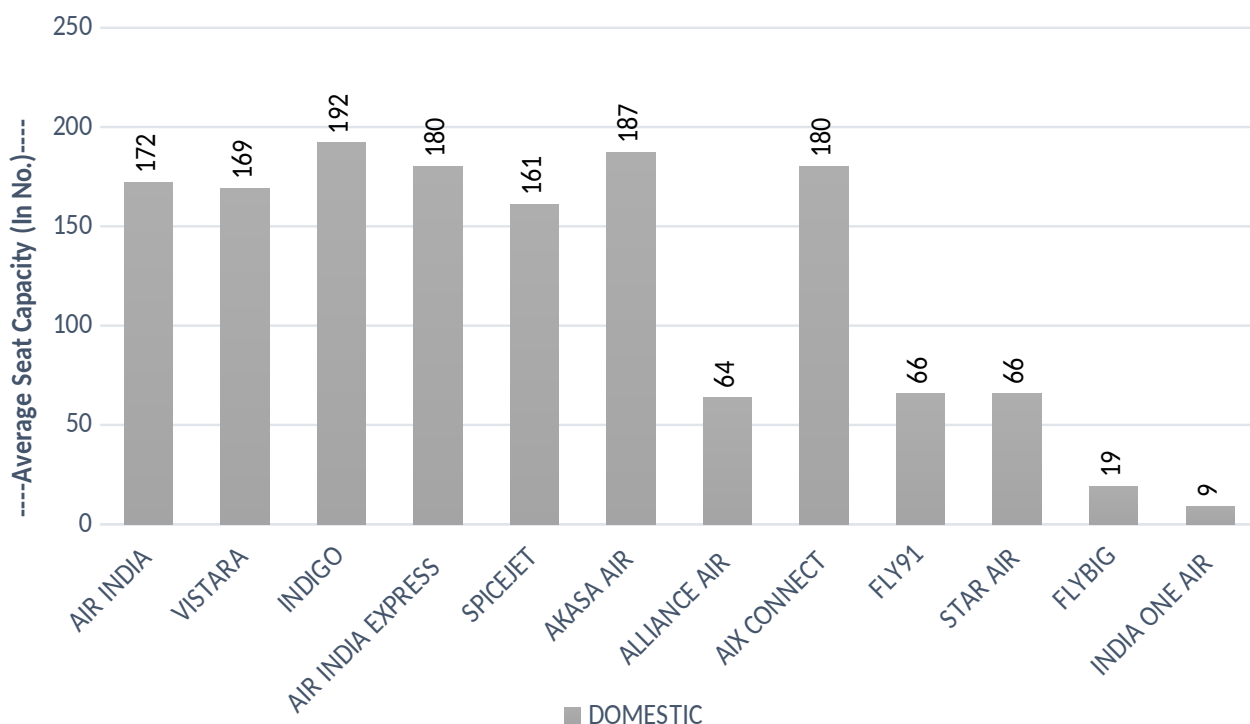

3. AIRCRAFT STATISTICS

Aircraft movement of domestic and international has registered a positive growth in the year 2024-25 over 2023-24

Table 7: Aircraft statistics at a glance

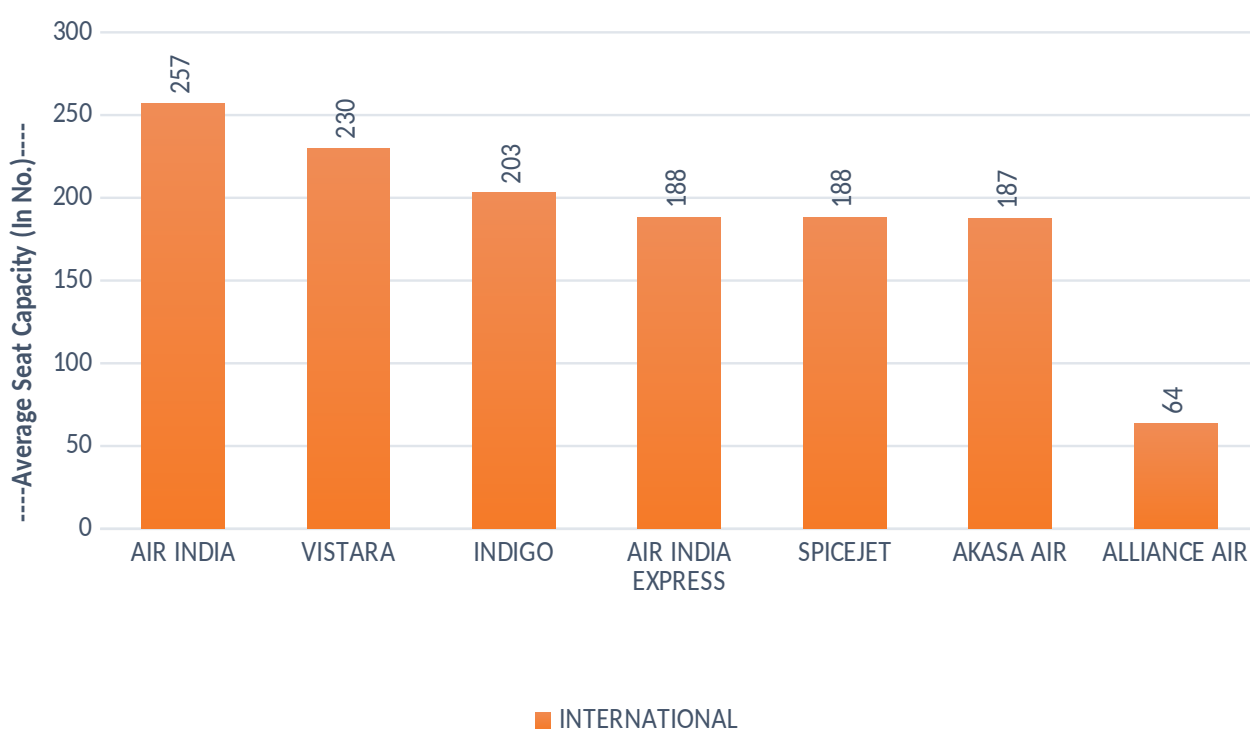

S. No.	Departures (in lakhs)	2023-24	2024-25 (P)
(1)	(2)	(3)	(4)
1.	SCHEDULED DOMESTIC	10.6	11.4
		(5.5%)	(7.4%)
2.	SCHEDULED INTERNATIONAL*	3.90	4.28
		(17.2%)	(9.7%)
<i>Note: 1. Figures in parenthesis refer to percentage change over previous year. These percentages given here are calculated using actual figures and not the rounded-off figures in lakhs.</i>			
<i>2. *International figure also includes the departures by Indian Airlines which operated totally outside the territory of India.</i>			

Chart 13 (a): Average seat capacity* of scheduled operating Indian fleet (2024-25)

*Average Seat Capacity= Total ASK / Total Aircraft Km. Flown

Chart 13 (b): Average seat capacity* of scheduled operating Indian fleet (2024-25)

**Average Seat Capacity= Total ASK / Total Aircraft Km. Flown*

Table 8: Fleet statistics of scheduled Indian operators as on 31st March, 2025

S. No .	Name of the operator	Type of aircraft	Number of aircrafts	Seat capacity

Source: Directorate of Airworthiness, DGCA.

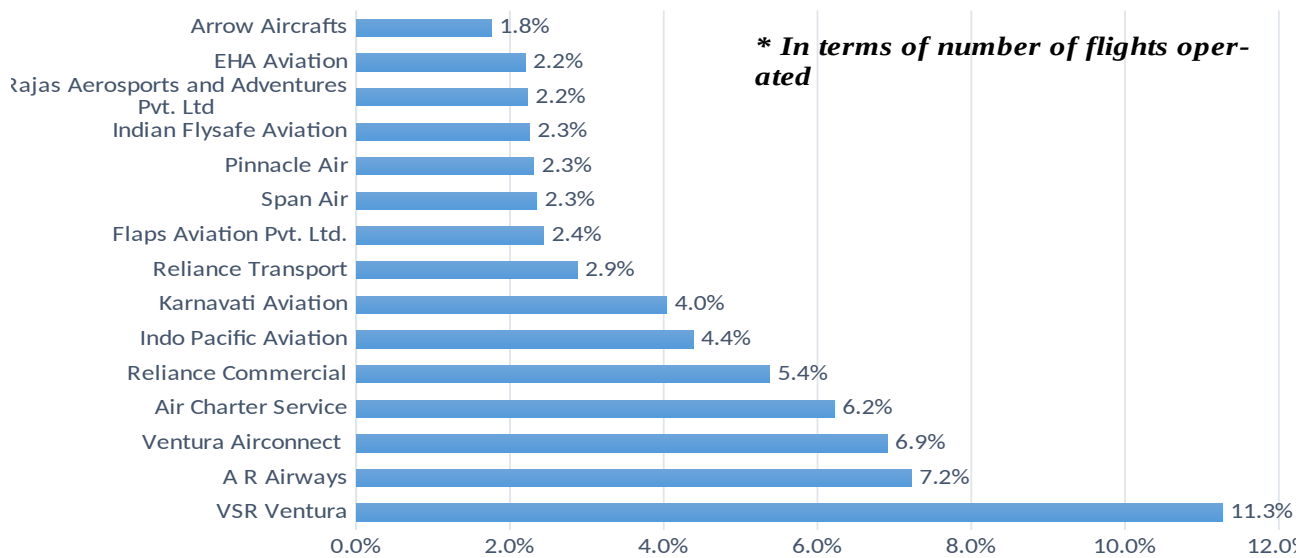

4. NON-SCHEDULED OPERATORS (NSOP) STATISTICS

Chart 14: Non-Scheduled Operators

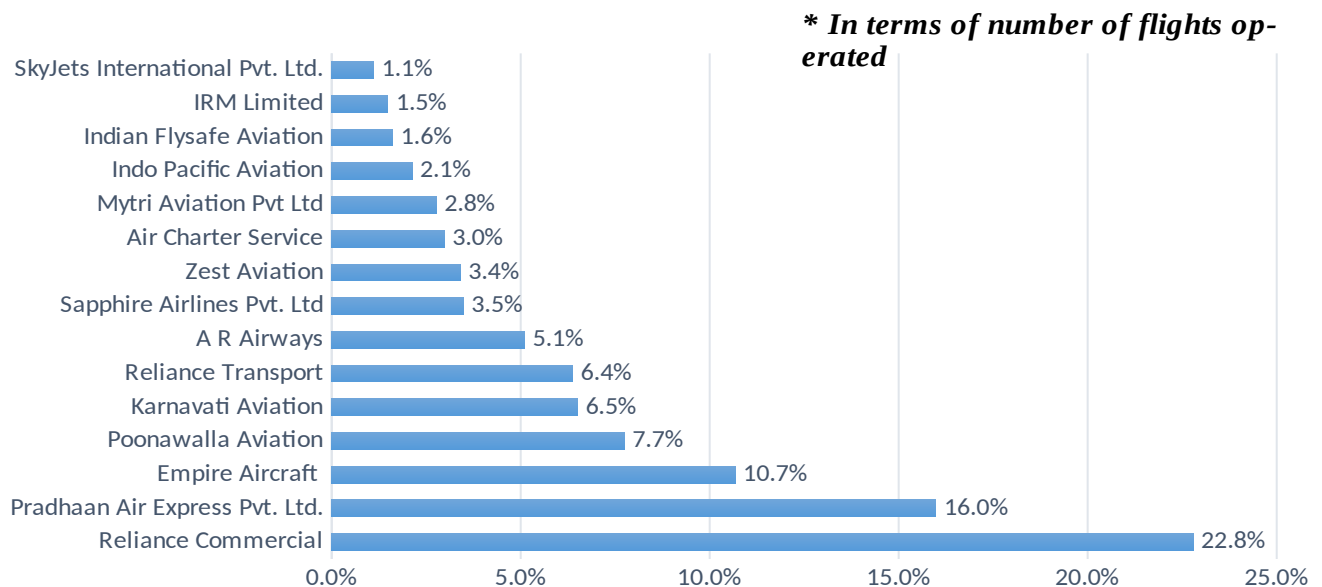

Source: Directorate of Air Transport- I

Chart 15: Top 15* NSOP-domestic (Fixed-wing) operations (% share), 2024-25

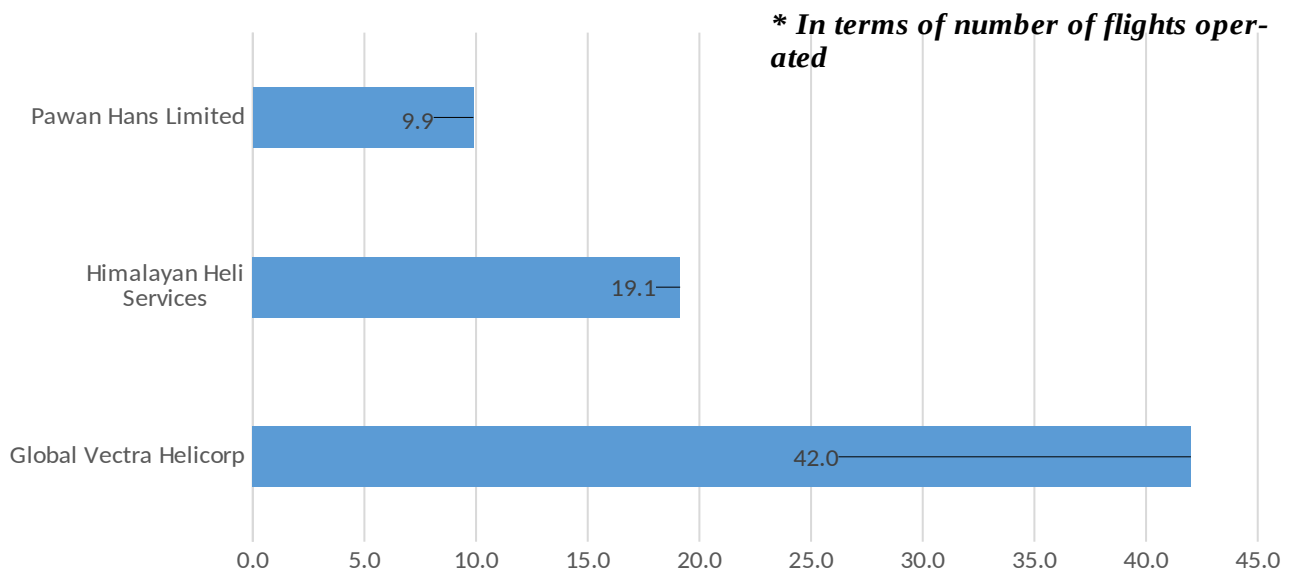

Out of 82 NSOP domestic (Fixed-wing) operators, top 15 operators accounted for almost 64% of the total number of domestic flights operated in the year 2024-25.

Chart 16: Top 15* NSOP-international (Fixed-Wing) operations (% share), 2024-25 (P)

Out of 82 non-scheduled international (Fixed -wing) operators, top 15 operators accounted almost 94% of the total number of international flights operated in the year 2024-25.

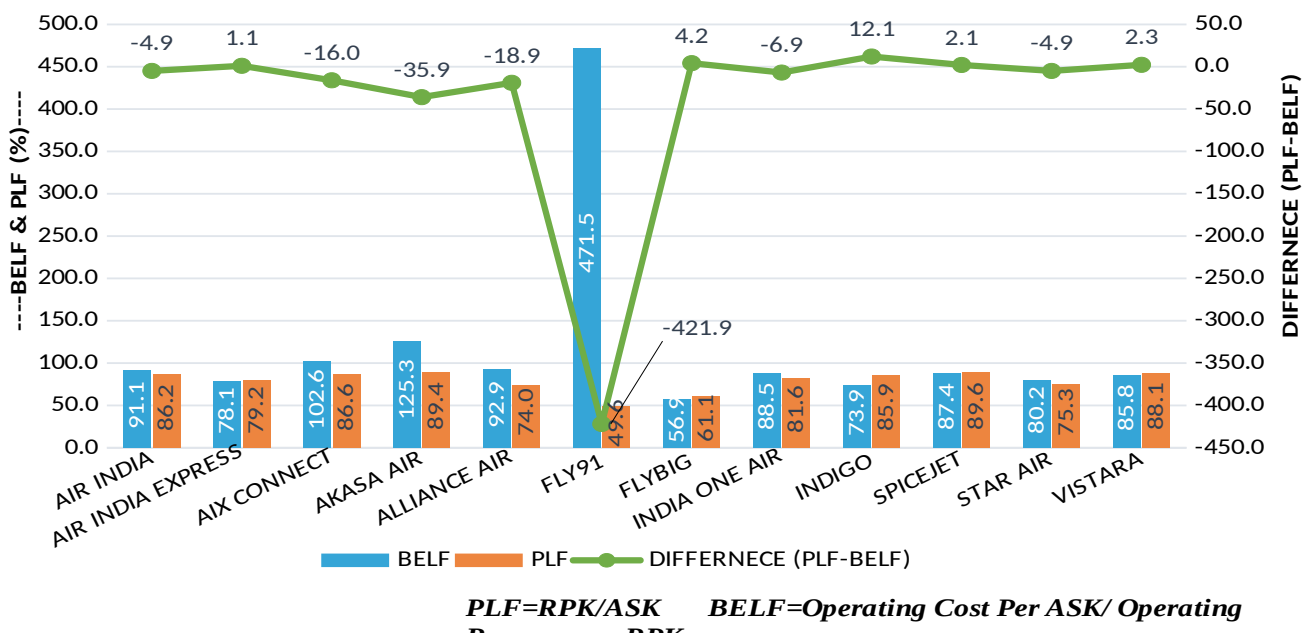

Chart 17: Top 3* Non-scheduled Rotary-wing operations (% share), 2024-25 (P)

Out of 54 non-scheduled Rotary-wing operators, top 3 operators accounted for 71.0 % of the total number of flights operated in the year 2024-25.

5. OPERATING ECONOMICS STATISTICS

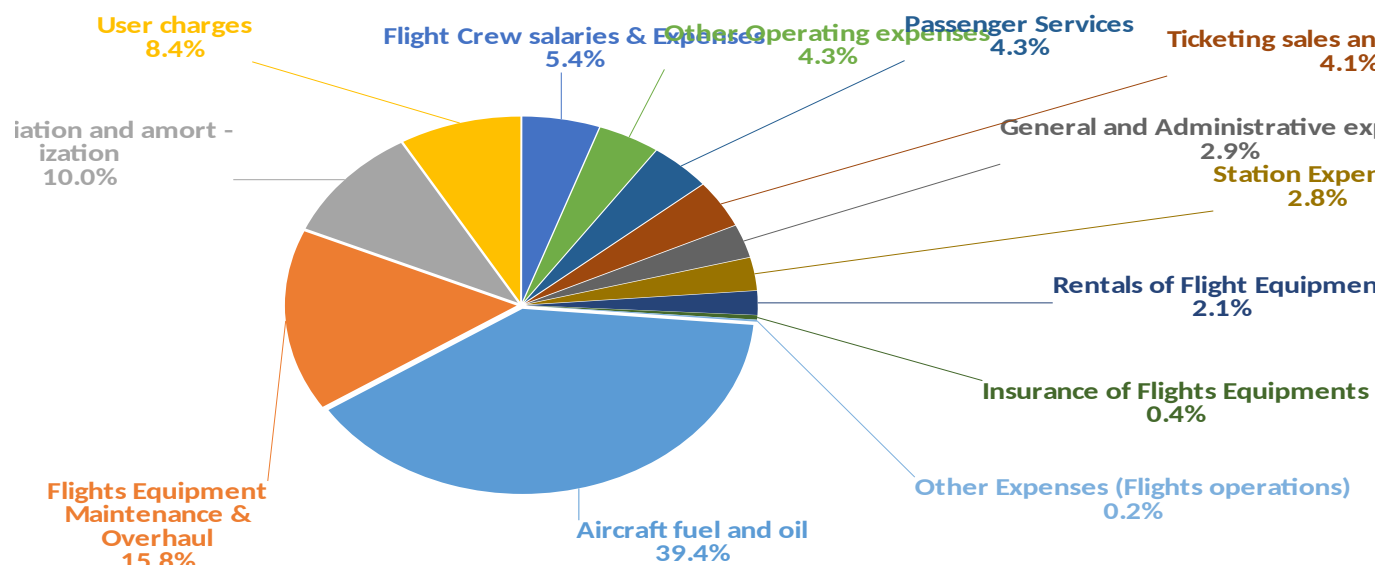

Chart 18: Comparison of Passenger Load Factor (PLF) and Break-Even Load Factor (BELF), 2023-24

A higher PLF implies that an airline is successful in selling available seats. However, higher PLF may not result in higher operating profit. When PLF is less than break-even load factor (BELF), the airline in question is running losses.

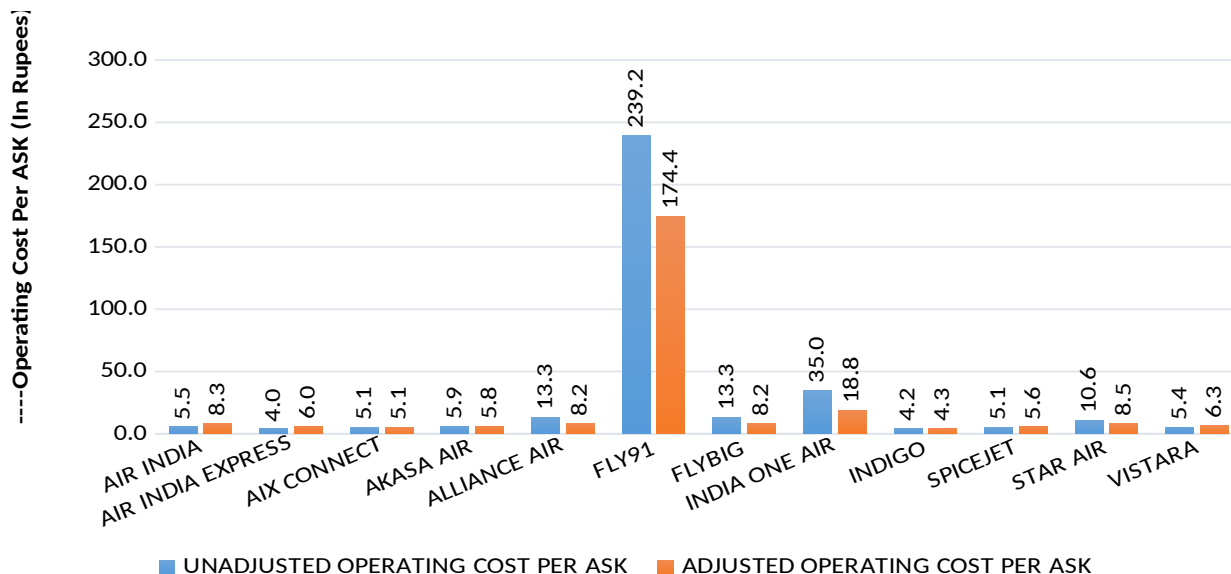

Evidently, in the year 2023-24, Air India Express, Fly Big , Indigo, Spicejet & Vistara were operating at a PLF higher than break-even load factor (BELF).

Chart 19: Approximate cost structure of aviation industry in India, 2023-24

While decomposing the airline industry cost structure, it can be seen that highest cost accounts to Aircraft fuel and oil with 39.4% followed by Flights Equipment Maintenance & Overhaul Charges (15.8%) of the of the total Operating Cost of Indian aviation industry.

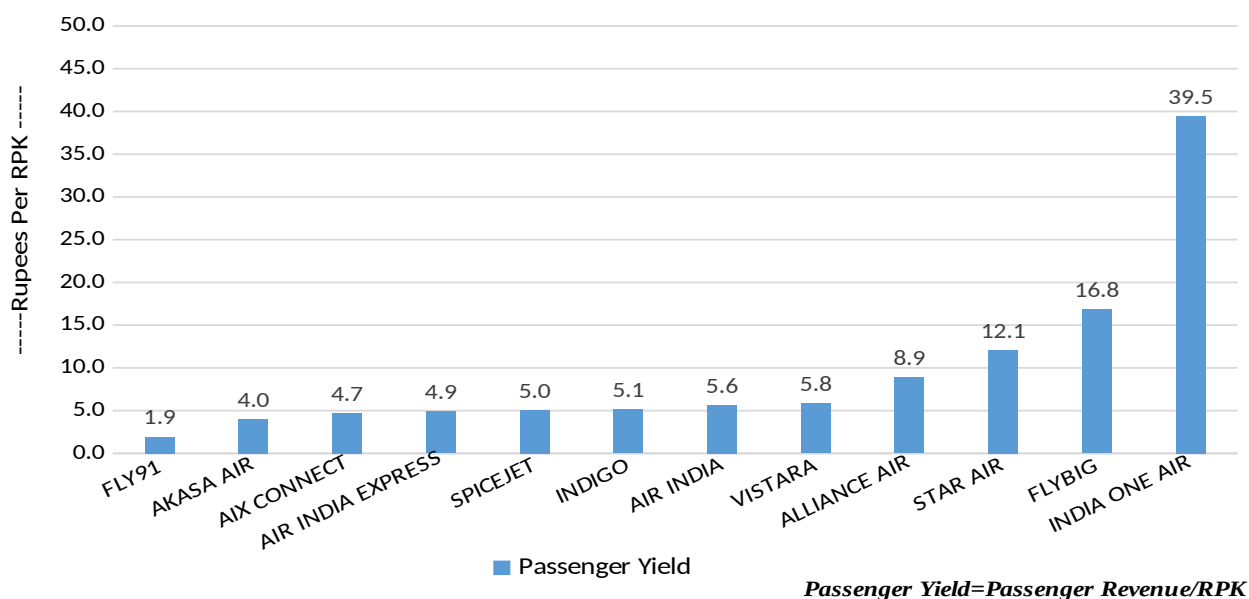

Chart 20: Operating cost per ASK, 2023-24

Operating cost per ASK adjusted for industry average stage length of 991.6 Km

The cost comparison was undertaken before and after adjusting Operating Cost to Average Stage Length. Because of high fixed cost of airlines unit cost decrease as distance increases. Hence, a stage length adjustment is necessary for fairer comparison. In the year 2023-24, Air India Express and Indigo had the least Adjusted Operating Cost Per ASK (adjusted for stage length) i.e. Rs 4.0 and Rs 4.2 respectively. In the same year, Fly 91 Air and India One Air had the highest Adjusted Operating Cost Per ASK (adjusted for stage length) i.e. Rs. 174.4 and 18.8 respectively.

Chart 21: Comparison of passenger yield of scheduled Indian carriers, 2023-24

Passenger yield is a measure of average fare paid per passenger km flown, calculated by dividing Passenger Revenue by Revenue Passenger Kilometers. In the year 2023-24, FLY91 had the lowest passenger yield followed by Akasa Air and AIX Connect.

Table 11: Financial summary of All Scheduled Indian Operators- 2023-24

S. No.	Airlines	Operating Revenue	Operating Expenses	Operating Result

CPL- Commercial Pilot License; ATPL-Air Transport Pilot License; PPL- Private Pilot License.
Source: Directorate of Training & Licensing, DGCA.

Chart 24: ASK per employee, (2023-24)

Available Seat Kilometer (ASK) per Employee is an indicator of efficiency both in terms of capacity planning and utilization of work force and is calculated by dividing Available Seat Kilometers by Number of Employees.

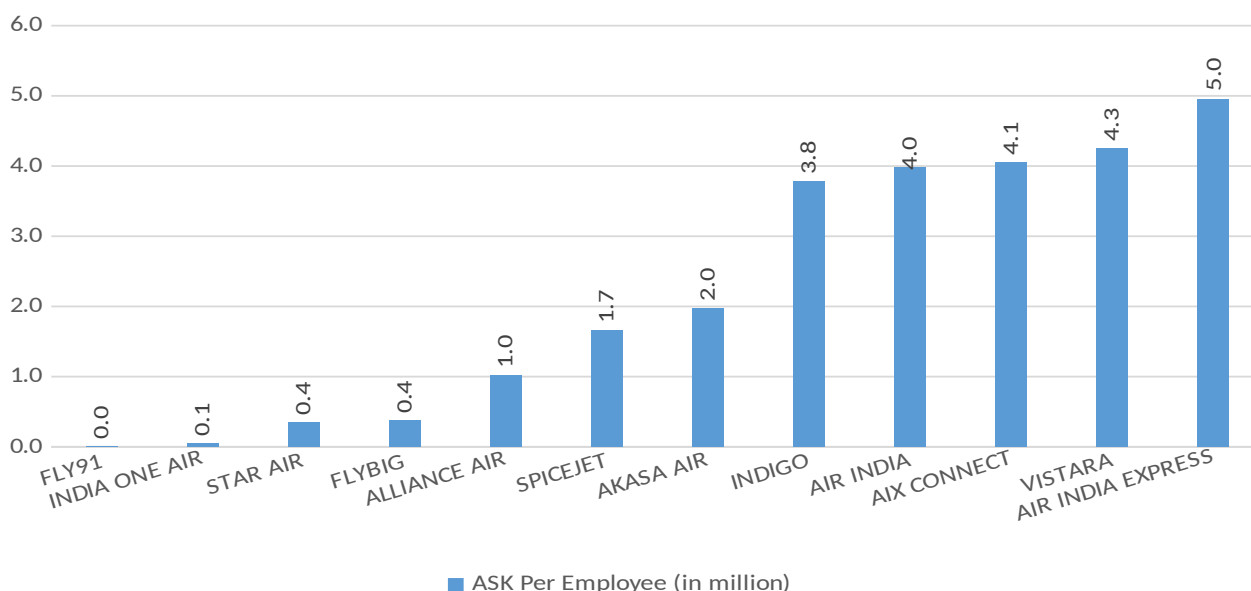

Chart 25: Revenue per Employee, 2023-24

Revenue per employee is an indicator of productivity of human resource of an airline and is calculated by dividing Operating Revenue by Number of Employees. Vistara employee productivity was highest followed by Air India and Air India Express.

8. OTHER AVIATION RELATED STATISTICS

Chart 26: Foreign Tourist Arrival & International Inbound Passenger Traffic

An important aspect of international traffic to and from India pertains to trend in foreign tourist arrivals in India. In 2023, Foreign Tourist Arrivals accounted for 29.7 % of inbound international

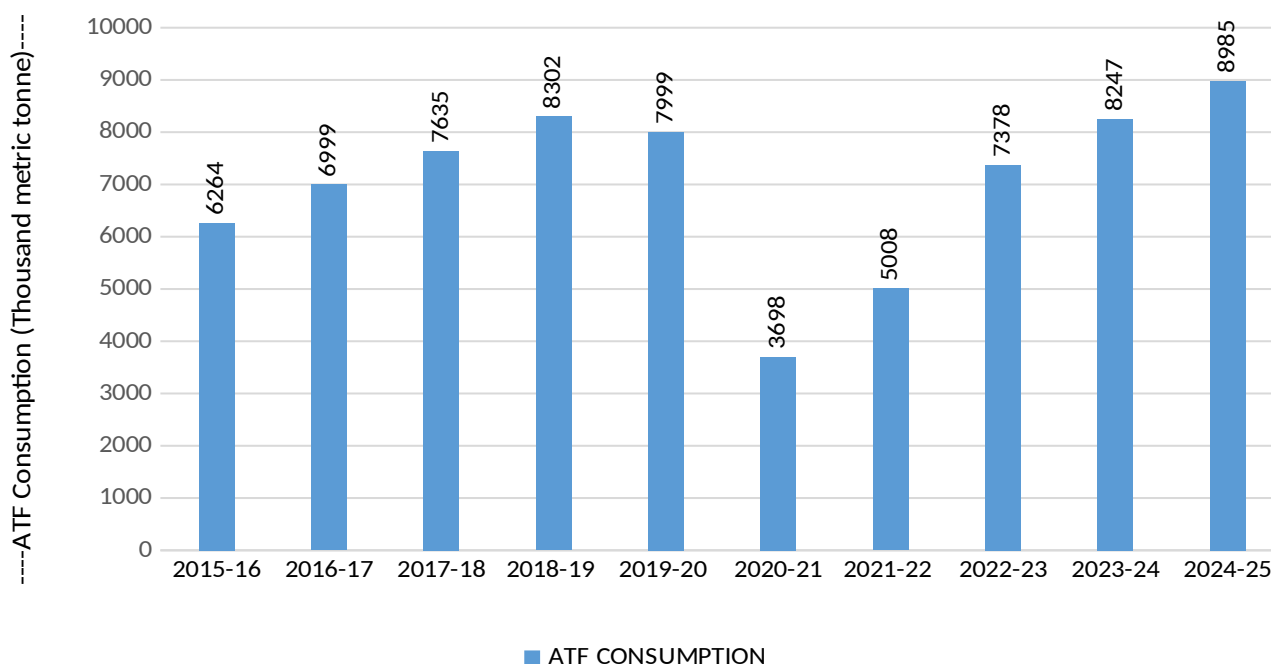

traffic in India.

Source: Ministry of Tourism.

Chart 27: ATF consumption over the decade

The Air Turbine Fuel (ATF) consumption growth in India has been moving in tandem with the growth of air traffic. In the year 2024-25, ATF consumption increased by 8.9% which is consistent with an increase in aircraft and air traffic movement.

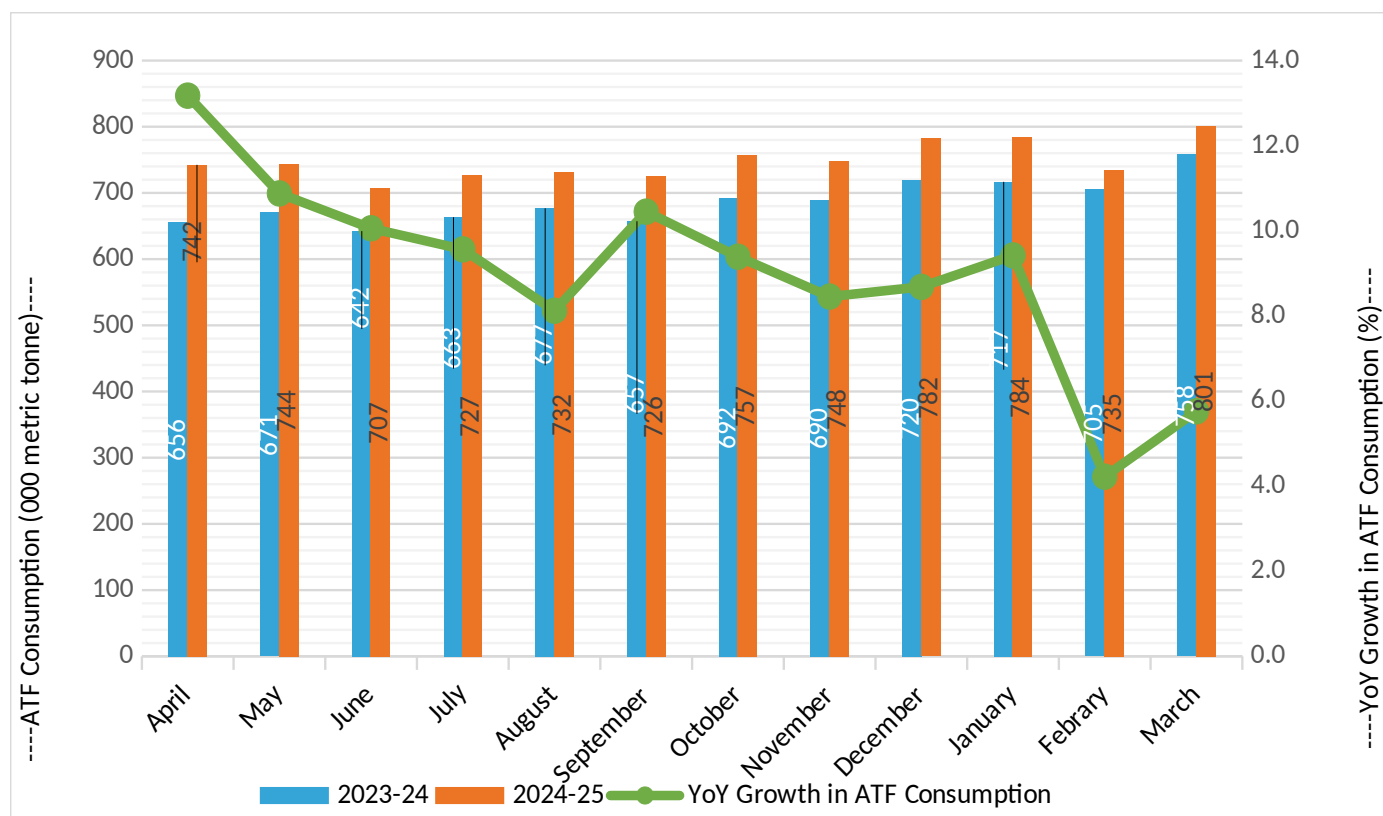

Source: Ministry of Petroleum & Natural Gas.

Note: 1. P- Provisional data.

2. Total may not tally due to rounding off.

Chart 28: Year-on-Year growth of ATF consumption, 2024-25

9. ABBREVIATIONS & DESCRIPTIONS

AAI	Airport authority of India	-
AI	Air India	-
ASK	Available seat kilometer	<i>ASK is calculated as the sum of products obtained by multiplying the total number of seats that are available in each flight stage by the corresponding stage distance.</i>
BELF	Break-even load factor	<i>BELF is calculated by dividing operating cost per ASK by operating revenue per RPK.</i>
K	Thousand	-
M	Million	-
MT	Metric tonne	-
PAX	Passenger	-
PLF	Passenger load factor	<i>PLF is a measure of capacity utilisation of airlines, which is calculated by dividing RPK by ASK.</i>
RPK	Revenue per kilometer	<i>RPK is calculated as the sum of the product obtained by multiplying the number of revenue passengers carried on each flight stage by the corresponding stage distance</i>
WLF	Weight load factor	<i>Tonne-kilometres performed expressed as a percentage of tonne-kilometres available</i>
-	Average seat capacity	<i>Average Seat Capacity is calculated by dividing total ASK by total Aircraft Km. flown.</i>
-	Average stage length	<i>Average Stage Length is calculated by dividing the total aircraft km flown by the total number of aircraft departure</i>
